Samuel Olanrewaju

I am a hardworking and goal-driven student passionate about Information Technology and art. This passion made me take courses on web development because I was inquisitive about how websites worked. After finishing the web development course by "The London app brewery", I was able to attain a strong knowledge of full stack web development. Now I am looking for a company to start my career in this field. I aim to learn as much as I can about web development and at the same time investigate other fields in IT like App development for various platforms and the integration of Artificial intelligence in our everyday lives and find ways to merge my love for art with my love for IT.

EDUCATION
